

My dear colleagues and friends.

We've met here today to discuss solutions on our topic „Integration of refugees into the labor market“. I'm pleased that we have the possibility to talk and find solutions in these times, because especially now refugees need our help. I am convinced that we will find solutions and work together in the future because this is a topic that every country here has to handle with. France is willing to find solutions with Germany and Italy for a better future for refugees and this can be achieved through working together.

We have carried out research in the field of the labour market in France and deepened the conditions of the refugees. We came up with the idea of creating an international NGO, where we will try to improve and deepen the aspects not yet fully effective, these are the aspects in our opinion to be improved:

- 1) Since the main problem for the integration of refugees is the language of the country, it would be right to create language courses in such a way as to make it easier to socialize and look for a job
- 2) Authorities in France don't accept refugees until an application for an asylum has been submitted, this must be changed. Give a place to refugees first, would be something positive both for the better integration of the individual into society, and also for the country itself
- 3) According to the law, a refugee should renew his application for asylum every six months, and so should his employment contract. Therefore it would be correct to extend this period both for the various bureaucratic situations, and for the life of the refugee
- 4) It would be very interesting to create projects aimed at learning to the refugee a profession, so that when he is inserted in the labour market it will already be prepared

Finally we want to point out that some of these ideas have already been thought of in the past even by Aurelien Tachè himself a French politician, and that the problems just mentioned are also common in Germany and Italy, so we will have to facilitate uniformly on the 3 countries.

The Problems in France are problems that occur nearly everywhere. So we should discuss solutions and ideas to overcome these problems- this is the right step into the right direction. As we know many things went wrong and we have to change this. These refugees come to our countries with hope. Hope for a better life. They live here and are willing to integrate themselves. SO we should help them. We are in charge because they are our countries and they are part of them. And I am willing to work on your project ideas. France is willing to work together including your problems and solutions for better conditions internationally.
